Summary

Pursuing MTech in Artificial intelligence and Machine learning from SIT Pune. I'm passionate about building machine learning and computer vision technologies that have impact on the "real world". I also Good with AR and IOT.

Experience

Founder

Stech Laboratory

Sep 2020 - Present (2 years 1 month +)

Freelance In All Domain (Web Development , App Development , Machine learning , Robotics , AR and Hardware Modules etc.)

Hackathon specialist

Sep 2020 - Dec 2020 (4 months)

Work as Hackathon Specialist

Team Lead

Team Robocon ACE

Jan 2019 - Oct 2020 (1 year 10 months)

Leading a team for ROBOCON 2020. we have a team of 25 people. In the competition, we have to make robots according to the theme of the competition. we cleared stage 1 for this competition and disqualify in 2nd round.

Student Partner Internship

Bolt

Mar 2019 - May 2019 (3 months)

To popularising the concepts of the Internet of Things(IoT) and Machine Learning(ML), brand awareness and business development of the Bolt IoT and ML online video training.

Registration Head

Ember 2019

Jan 2019 - May 2019 (5 months)

Education

SIT- Symbiosis Institute of Technology

Master of Technology - MTech, Artificial Intelligence and Machine Learning

Jul 2022 - Jul 2024

Careers for Engineering Students

BE - Bachelor of Engineering, Electrical, Electronics and Communications Engineering
2016 - 2020

Licenses & Certifications

Using Python for Automation - LinkedIn

Advanced Python - LinkedIn

ARKit and Unity: Build a Drivable Car in Augmented Reality - LinkedIn

Applied Machine Learning: Algorithms - LinkedIn

MATLAB 2018 Essential Training - LinkedIn

Faster Python Code - LinkedIn

Learning Python - LinkedIn

Ethical Hacking: Introduction to Ethical Hacking - LinkedIn

Ethical Hacking: Footprinting and Reconnaissance - LinkedIn

Writing a Compelling Blog Post - LinkedIn

SEO for Social Media - LinkedIn

Programming Foundations: Object-Oriented Design - LinkedIn

Ethical Hacking: Vulnerability Analysis - LinkedIn

Learning the Python 3 Standard Library - LinkedIn

Programming Foundations: Algorithms - LinkedIn

Building and Deploying Deep Learning Applications with TensorFlow - LinkedIn

Learning MATLAB - LinkedIn

Programming Foundations: Real-World Examples - LinkedIn

Strategic Planning Foundations - LinkedIn

Python GUI Development with Tkinter - LinkedIn

Ethical Hacking: Scanning Networks - LinkedIn

Ethical Hacking: Enumeration - LinkedIn

Machine Learning & AI: Advanced Decision Trees - LinkedIn

Critical Thinking - LinkedIn

Time Management: Working from Home - LinkedIn

Ethical Hacking: Cloud Computing - LinkedIn

Python: Advanced Design Patterns - LinkedIn

Parallel and Concurrent Programming with Python 1 - LinkedIn

Become a Python Developer - LinkedIn

WordPress 5 Essential Training - LinkedIn

Programming Foundations: Fundamentals - LinkedIn

AWS Educate Machine Learning - DeepRacer - Amazon Web Services (AWS)

Skills

Python (Programming Language) • Unity3D • Internet of Things (IoT) • Engineering • Entrepreneurship
• Process Automation • Algorithms • Machine Learning • Network Security • Cybersecurity

Honors & Awards

Winner for National Level COVID-19 E-Hardware Hackathon - K.C college of Engineering
May 2020

2nd Prize at Atmanirbharta COVID-19: Startup competition - AISSMS College of Engineering
Jun 2020

finalist in Delhi hacks - Script foundation
Sep 2020

finalist in Technoxian International robotics competition 2019. - Technoxian
Sep 2019

We team of 5 people participated in an international robotics competition. In the theme of the fastest line follower robot. which is held in Delhi.

Finalist In hacknagpur - Hacknagpur
Dec 2020

We make a project For helping drivers to drive safely. that is a smart driving assistant for drivers

Winner At Orian Hack 2021 - KC College Of Engineering
May 2021

We Developed a Hardware System to Prevent an Accident .

Finalist In NIC 2020 - MHRD innovation Cell
May 2021

Project Name :- Drishti Smart Aid for Blind people
